Overall progress of TMSS

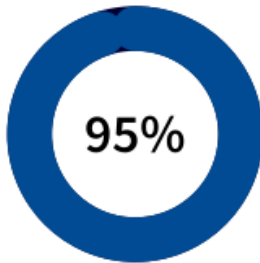

100%

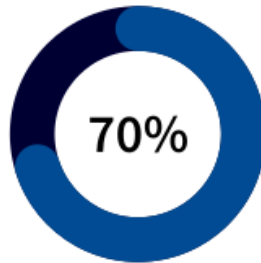

January 2020 - June 2021 extended till September 2021

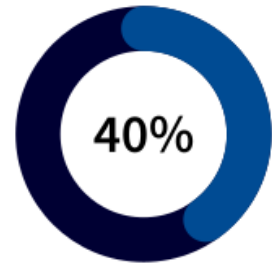

Project Administration and Reporting

Task Specification

Dynamic Scheduling

Responsive Telescope

Science use cases

DUPLLO-UC1	75%
DUPLLO-UC3	70%
Commensal-DUPLLO-UC3	0%
DUPLLO-UC2	70%
L1UC03 Epoch of reionization	80%
L1UC05 Cosmic Magnetism	85%
L1UC08 Cosmic Rays	20%
L1UC11 Pulsar timing	80%
L1UC13 (Rapid) follow-up of gravitational wave events and other transients	50%
L1UC16 Lightning	30%

Operational use cases

Fly's eye	80%
Holography	0%
TABHolography	60%
StationTest	50%

Current focus

Commissioning beamformed observations and pulsar pipeline. Dynamic scheduling. Cycle reports, User administration, UI improvements. Optimizations. Adding cycle 16 use cases, Roll-out to production.

Future focus

Reporting, Dynamic Scheduling, Beamformed + Imaging, UI improvements, Optimizations
